CUBE FOR CIVIL ENGINEERING

Building the Future,
One Cube at a Time

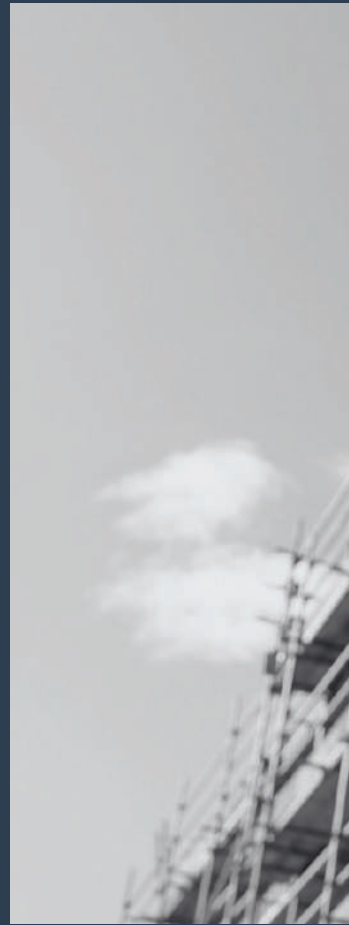

Introduction

At Cube Engineering, we believe in constructing more than just buildings and infrastructure; we build the foundation for tomorrow's communities. With a commitment to excellence and a passion for innovation, Cube Engineering stands at the forefront of civil engineering, transforming visions into reality through meticulous planning, cutting-edge technology, and sustainable practices.

Our Services

Each project represents a unique challenge and opportunity for Cube Engineering to demonstrate its expertise and commitment to excellence in the field of engineering.

Our Mission

Cube Engineering is committed to delivering innovative, sustainable, and high-quality engineering solutions that exceed client expectations. We strive to be a leader in the engineering industry by fostering a culture of excellence, integrity, and continuous improvement. Our goal is to create structures and systems that are not only functional and efficient but also contribute positively to the communities in which they are built.

Our Goals

To provide comprehensive engineering services that cover the entire project lifecycle, from initial design to final execution.

To maintain a strong focus on client satisfaction by delivering projects on time, within budget, and to the highest standards of quality.

To embrace technological advancements and industry best practices.

Private Villas in Durrat Al Arous

Executingbone, Electromechanics, Finishing

The project involves the electromechanical finishing works for a series of private villas located in the prestigious Durrat Al Arous development. The scope of work includes the execution of all electromechanical systems to ensure the villas are equipped with state-of-the-art facilities and infrastructure.

Executingbone Electromechanics

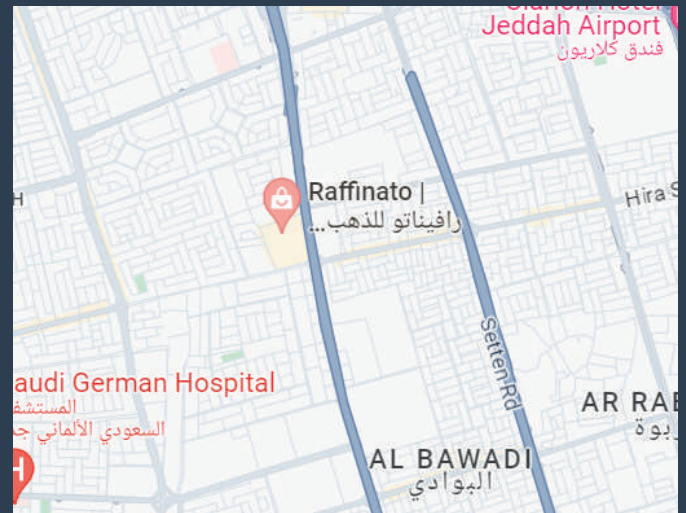

Finishing

.02

Ravenato Gold and Jewellery Exhibition

Design, implementation of finishing works

This project involved the design and implementation of a sophisticated exhibition space for Ravenato Gold and Jewellery. The exhibition was designed to showcase the brand's exquisite collection in a secure and elegant environment. Cube Engineering focused on creating a space that would enhance the customer experience and reflect the brand's prestige.

Finishing

.03

Rastaka Restaurant & Cafe

Design, implementation of restoration and finishing

Cube Engineering was tasked with the design and construction of the Rustica Restaurant & Cafe. The project aimed to create a unique dining experience by combining rustic charm with contemporary design elements. The restaurant features an open kitchen, a cozy dining area, and a relaxing outdoor terrace, making it an ideal spot for both casual and special occasion dining.

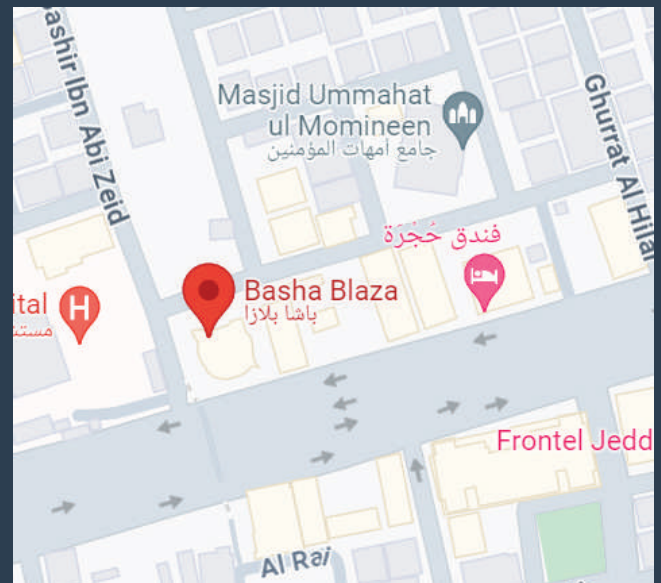

Restoration and finishing

.04

Al-Ahzam Trading Company Office

Design, finishing

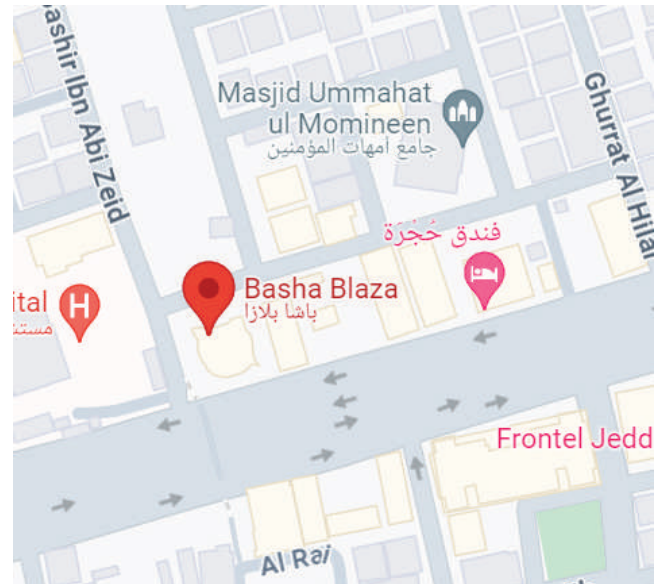

The Al-Ahzam Trading Company Office project involved the design and build of a modern office space that would accommodate the company's growing team and reflect its corporate identity. Cube Engineering designed a space that is both functional and aesthetically pleasing, with an emphasis on creating a productive work environment.

.05

Cladding Facades for Commercial Building in Makkah

Execution

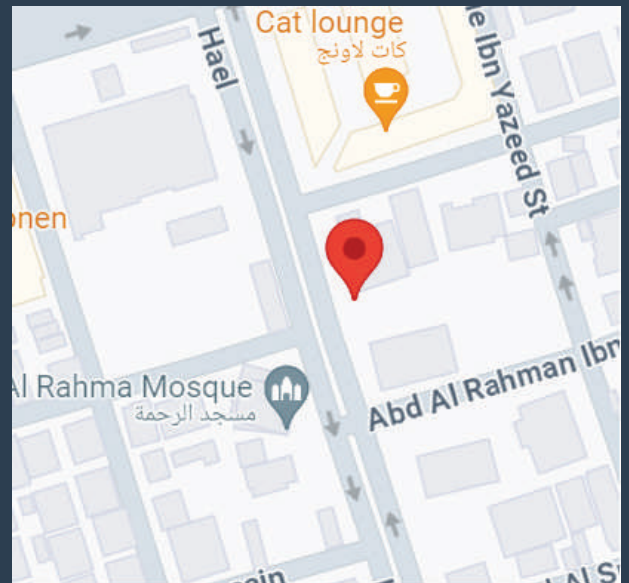

This project focused on the design and installation of cladding facades for a commercial building in Makkah. The cladding not only enhances the building's appearance but also provides protection and insulation. Cube Engineering's design aimed to create a striking visual impact while ensuring the facades are durable and low-maintenance.

.06

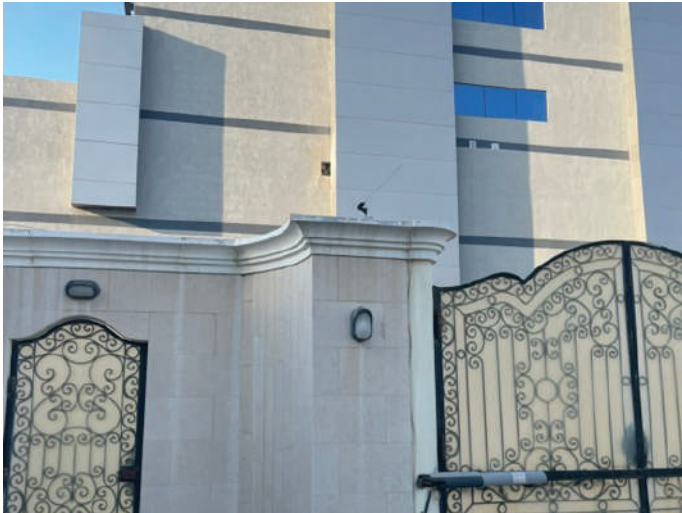

Private villa

Facade restoration

Cube Engineering was commissioned to design and build a residential home for Mr. Osama Baeshen. The project aimed to create a luxurious yet comfortable living space that reflects the client's personal taste and lifestyle. The house features advanced smart home technology, high-quality finishes, and a design that maximizes natural light and outdoor views.

Facade restoration

.07

Mixed use building design

Design

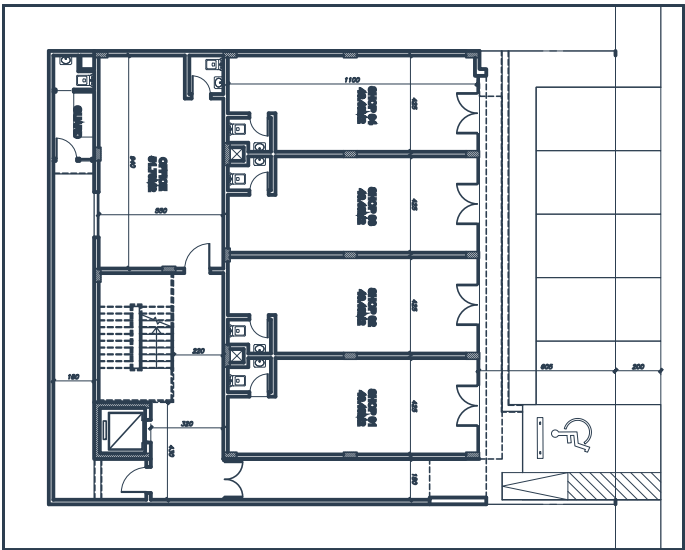

Project to develop a multi-use building that seamlessly integrates residential, commercial, and recreational spaces. This project aims to create a vibrant community hub that offers a variety of amenities and services within a single, cohesive structure. The project includes Concept design, architectural drawings, structural drawing and MEP

.08

Red Sea International Film Festival

Employee Offices for the Red Sea Film Festival

For the Red Sea Film Festival, the team was tasked with setting up dedicated offices for the festival staff. The work involved designing comfortable and functional spaces suitable for the creative and logistical needs of the festival. The project emphasized selecting modern and ergonomic furniture, installing lighting and communication systems, and ensuring that the offices were fully operational and ready to accommodate the team efficiently.

Design, implementation

.09

Entertainment

Recreational Festival with
Game Booths

This project involved organizing a recreational festival featuring various game booths designed to attract all age groups. The work included creating innovative booth designs that reflected a fun and engaging atmosphere, ensuring a memorable experience for visitors. Coordination with multiple vendors ensured the festival was equipped with all necessary logistical services, contributing to the event's success and visitor enjoyment.

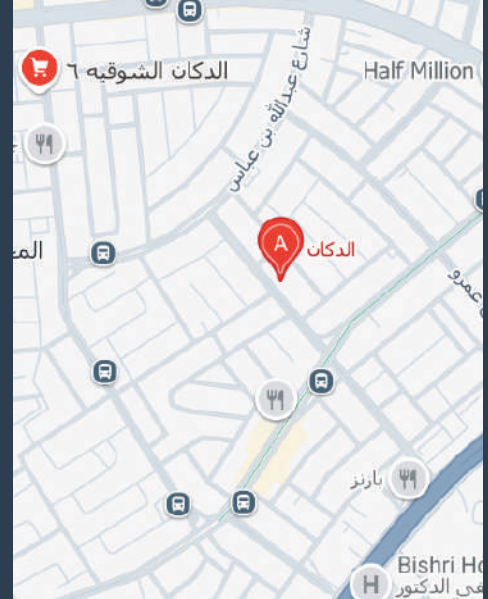

Design

.10

Dukan- Al Naeem Branch

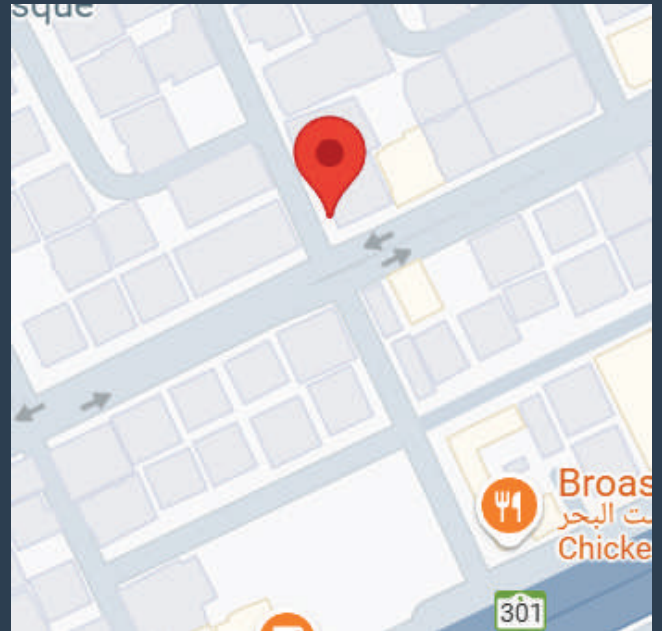

Complete Shop Setup and Finishing

This project involved the complete setup of the "Al-Dukkan" supermarket, from initial planning to final delivery. The work included designing interior spaces tailored to the store's requirements, selecting appropriate materials and furniture to meet customer needs, and installing electrical and mechanical systems. The final finishing was executed with precision to ensure an attractive appearance and optimal functionality, providing a comfortable shopping experience for customers.

Constructing

.11

Dukan- Walyal Ahd Makkah

Complete Shop Setup and Finishing

This project involved the complete setup of the "Al-Dukkan" supermarket, from initial planning to final delivery. The work included designing interior spaces tailored to the store's requirements, selecting appropriate materials and furniture to meet customer needs, and installing electrical and mechanical systems. The final finishing was executed with precision to ensure an attractive appearance and optimal functionality, providing a comfortable shopping experience for customers.

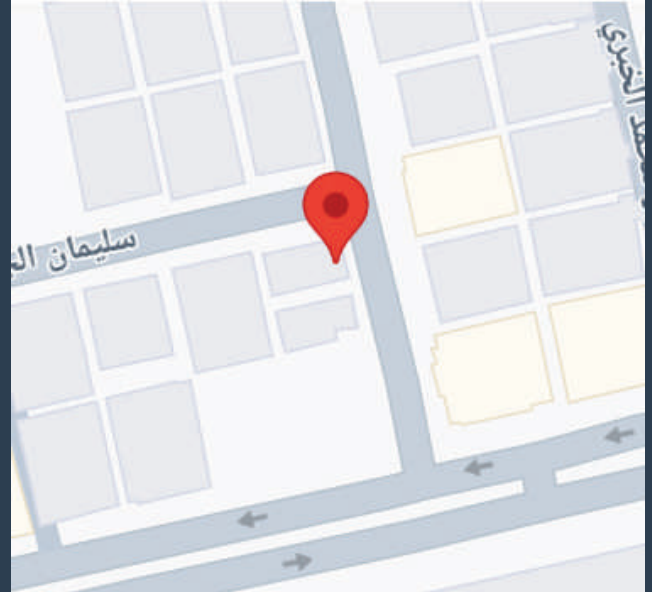

Constructing

.12

Al Rayyan

Building a Floor with Turnkey Delivery

This project entailed constructing a new floor for a residential or commercial building in line with architectural and structural standards. Tasks included preparing detailed execution plans, overseeing the construction process, and selecting interior and exterior finishes to meet client specifications. The project was delivered as a turnkey solution, ensuring that every final detail was ready to exceed client expectations.

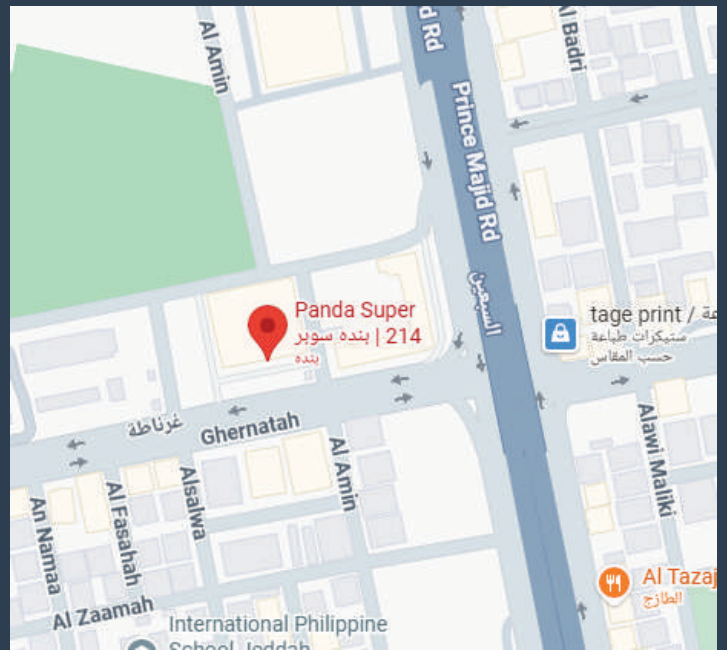

Constructing

.13

Panda Retail Stores

Maintenance & Renovation

A comprehensive maintenance and renovation project was executed for multiple Panda retail branches, covering all operational maintenance and interior refurbishment works in accordance with the highest technical standards. The project focused on enhancing infrastructure efficiency, upgrading interior spaces, and ensuring uninterrupted store operations. All works were delivered in compliance with approved schedules, safety requirements, and client quality standards.

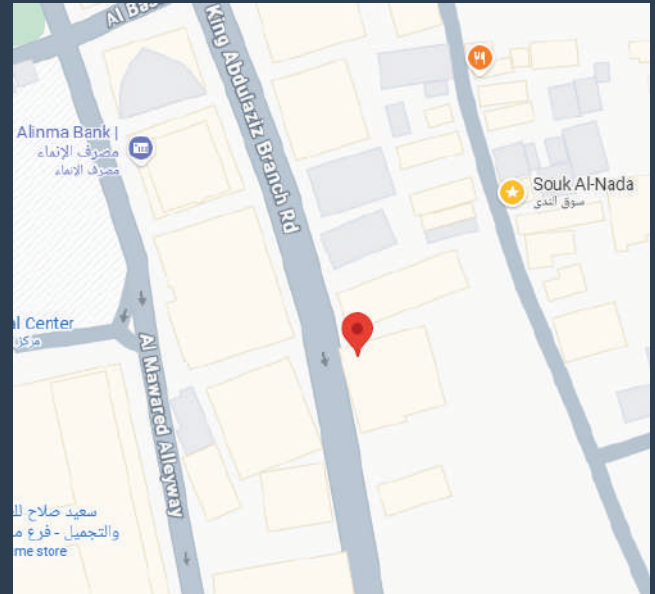

Full renovation

.14

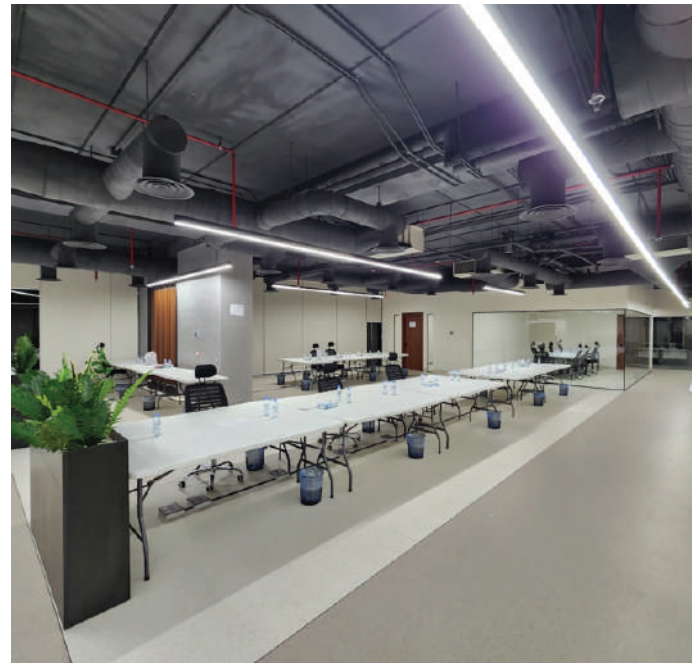

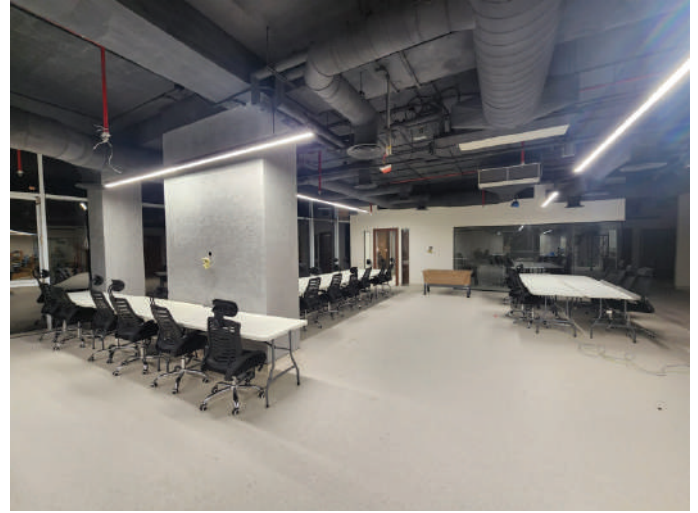

Red Sea International Film Festival

Full office design and fit-out execution

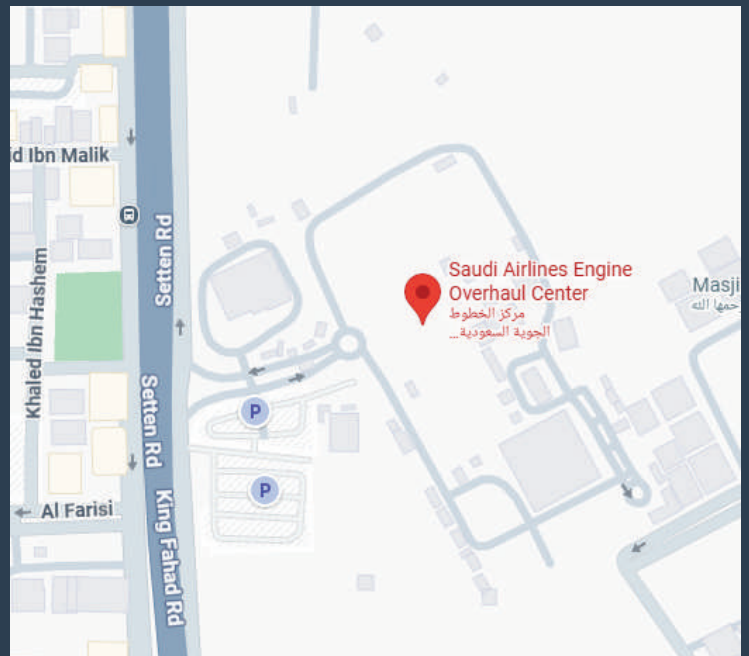

A full fit-out project for the main offices of the Red Sea International Film Festival, including design, execution, and final furnishing. The project was delivered to reflect the festival's cultural and artistic identity, with a strong emphasis on high-quality finishes, precise execution, and architectural detailing, ensuring a professional and functional working environment for the organizing entities.

design, execution, and final furnishing

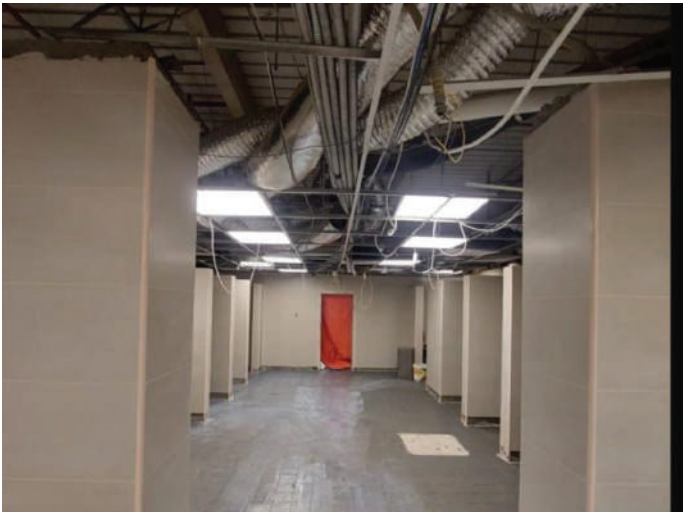

.15 Jeddah airport station

Facilities

This project focuses on the architectural and interior design of public restroom facilities at Jeddah Airport Station, addressing high user traffic, durability, and ease of maintenance. The design prioritizes clear spatial organization, smooth circulation, and user privacy through well-structured layouts and efficient zoning.

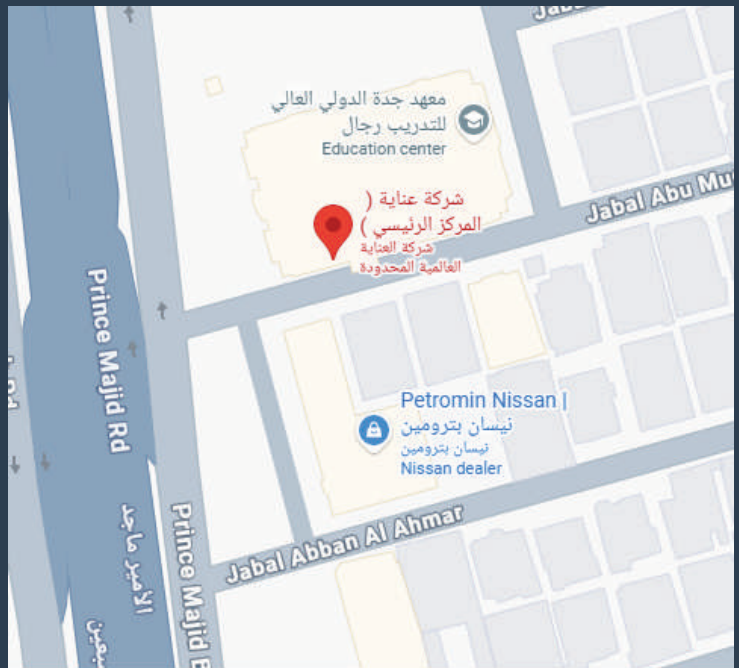

Public Facilities

.16

Enaya care salon and spa

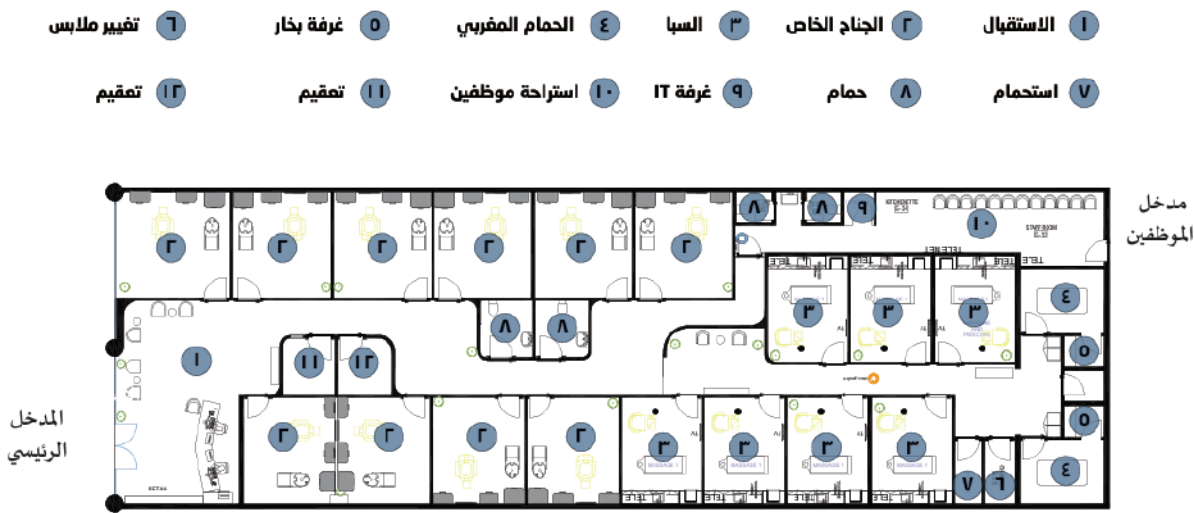

Design

Enaya is a holistic architectural concept for a men's care center that elevates the traditional barbershop experience into a refined and private wellness journey. The design focuses on creating a calm, luxurious environment where privacy and comfort are prioritized through the use of individual suites and carefully curated spaces for grooming, relaxation, and wellness. The program includes hair-cutting suites, spa and massage rooms, and a Moroccan bath, all organized within a clear and functional spatial hierarchy.
